

TerraForm Power owns and operates a best-in-class renewable power portfolio of solar and wind assets located primarily in the U. S. and E.U., totaling more than 3,700 MW of installed capacity. TerraForm Power's goal is to acquire operating solar and wind assets in North America and Western Europe. TerraForm Power is listed on the Nasdaq stock exchange (Nasdaq: TERP). It is sponsored by Brookfield Asset Management, a leading global alternative asset manager with more than \$350 billion of assets under management.

ASSET MANAGER, WIND:

Location: New York City

Role Summary:

Reporting to the Vice President, Wind Operations, this individual will be responsible for project reporting, performance analysis, preventive and corrective maintenance programming, preparation of capital and Operations & Maintenance budgets and collaborating with internal financial teams to support their external and internal analysis and reporting requirements. This is an exciting opportunity to join a dynamic team in a growth-oriented company.

Responsibilities:

- Responsible for project life cycle optimization including energy production, capital re-investment and annual Operations and Maintenance programming.
- Responsible for identifying and formulation of business case(s) to re-power operating assets.
- Responsible for the indentation and initial technical and economic assessment of complementary technologies to increase project value and returns.
- Responsible for leading root cause analysis for asset underperformance and collaborating with TERP Engineering to identify, justify and recommend strategies to address.
- Work collaboratively with the Regional Wind Operations Manager to support their responsibilities to ensure all work performed on TERP wind assets is performed with a high regard for Safety and the Environment consistent with good utility practices.
- Work collaboratively with Financial Planning and Analysis in providing energy production information and supporting variance analysis and operating summaries.
- Develop & manage project budgets, models, contracts and stakeholder & customer relations.
- Demonstrated commitment and participation in developing an accident free work environment.
- Demonstrated understanding and commitment of a Safe Work Management and Environment System.
- Demonstrated understanding of environmental aspects with respect to wind generation.
- Demonstrated understanding of the major components and systems that contribute to top wind generation performance.

Qualifications/Requirements:

- Degree in engineering or any other technical field; Additional education in finance or accounting preferred
- Advanced computer skills especially in MS Office especially Excel
- Proven experience in negotiation
- Proven experience in Asset Management or operations of renewable portfolios
- Experience in Storage technologies preferred
- Experience in green field and/or brownfield development preferred
- Preference for Mechanical / Electrical Engineer with 6 to 8 years' experience. MBA is considered to be an attractive attribute but not essential
- Work knowledge of US and Canadian renewable energy and storage markets
- Strong analytical skills and preferable experience in budget preparation and management
- Technical understanding of wind generation and energy storage
- Familiarity with computerized SCADA/Monitoring systems, interconnection agreements and data management
- Strong business acumen and commercial and financial mindset
- Demonstrated strong technical and commercial skills with respect to renewable energy generation, particularly with wind technologies, and associated balance of plant

- Demonstrated working knowledge of the North America Bulk Power System and its associated regulatory environment (e.g. NERC, Regional Transmission Organizations)
- Proven ability to work well within a multi-disciplinary team
- Ability to understand financial models and the potential impact of operations on investments
- Ability to define issues, analyze problems, evaluate alternatives and develop sound conclusions
- Exceptional influence and communication skills both verbally and in writing with superiors, peers, partners and other stakeholders
- Ability to manage a portfolio of assets

Desired Characteristics:

- Ability to “roll-up” her/his sleeves and get involved at a detailed level to ensure that appropriate solutions are delivered in a timely way;
- Ability to work within a fast-paced environment;
- Ability to adapt to different styles and develop strong relationships with employees at all levels in the organization;
- Comfortable performing multifaceted projects in conjunction with day-to-day activities.
- Enthusiastic & High Energy level
- Thinks strategically first, and operationally second
- Team player, positive, willingness to learn & adapt to business needs
- Strong written and verbal communication skills
